

FUSION^{HAY} MERGER

Merge into
oncoming profit

Cutting costs is just good business. So, when there's talk of mergers, join together profit and productivity with the Agway Fusion Hay Merger.

AGWAY
MANUFACTURING INC.

cutting hay, costs & time.

Attaching the Agway Fusion Hay Merger to your mower increases efficiency without adding extra time or costs to harvesting hay.

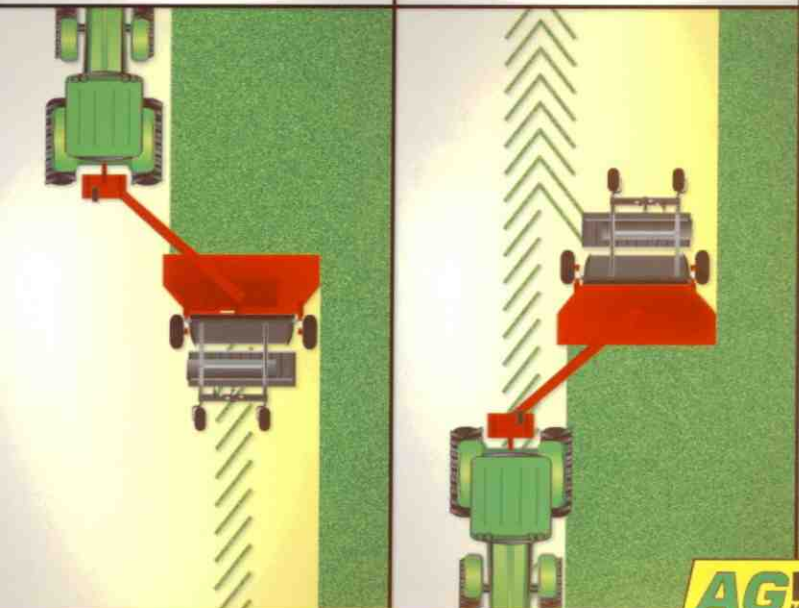

In fact, using the Fusion saves time and money by cutting the number of windrows by half. This reduces the major expense of running a forage harvester, spending less time on each field and finishing the job faster.

IN RAISED POSITION

IN LOWERED POSITION

As you mow, the Fusion's two-stage process is easily controlled by one switch, lowering and starting the conveyor all at the same time.

Start merging up to 15-foot wide swaths into 30-foot windrows by connecting the Fusion to most major brands of haybines available.

Beat bad weather and pay less to harvest your hay with the Agway Fusion Hay Merger by contacting your authorized dealer today.

Patent Pending.
