## HAY CONDITIONER

The  
**fastest way**  
to improve hay quality,  
drying time and profit

**AGWAY**  
MANUFACTURING INC.

**ACCELERATOR**  
HAY CONDITIONER 7500T

# ACCELERATOR HAY CONDITIONER

**Spreader (Optional)**  
Evenly distributes hay in wide rows where both sun and wind touch it at once.

**Heavy-Duty Chain Drive**  
Transfers power evenly from PTO to both rollers, ensuring constant tension at any roller setting which is achieved by an exclusive pivoting jack shaft.

**Adjustable Steel-Paddle Rollers**  
Increase or decrease amount of desired crimp by easily adjusting top roller up or down. Solid roller construction ensures consistency of crimping every time.

**Walking-Beam Tandem Axle**  
(Available on 7500T & 9500)  
Improves smoother travel on bumpy fields by reducing bouncing, keeping unit in better control.

**Raised - Transport Position**

**Lowered - Low ground clearance ensures no hay is missed**

**Fusion Merger/Inverter Attachment**

- Inverts the swath and places it on dry ground. It is also used to combine up to three swaths into one.
- Merges swaths cut from up to 16' wide windrowers.

## Better hay, better pay

Harvesting premium quality hay is often out of your control, relying on good weather and a lot of luck. Producers are now seeing the benefits of conditioning hay for consistently better results. **The Agway Accelerator is your fastest way to better hay by reducing drying time, creating greener, sweeter and softer hay.**

The Accelerator's easy operation conditions hay by simply running it through adjustable steel crimping rollers, up to 15 mph. This process cracks the hay stems without knocking off the leaves. Conditioning also fluffs the hay, allowing air to flow through the swath, for faster and more even drying from top to bottom. Speed up your operation with the Agway Accelerator producing better hay, faster drying time and bigger profits. Contact your authorized Agway dealer for more details.
