PIT BULL™ DOZER BLADES

Push, pile and perform with the class-leading features of Pitbull dozer blades. Greater blade control, easy quick attach and the most compact mounting system available make Pitbull the top dog for silage, dirt and snow applications.

Pitbull Blades are available in two size categories for tractors 300 - 600HP and 400 - 600HP. Built using T1 grade steel with AR400 wear points, Pitbull Blades are made in Canada and come with a 2-Year Warranty – the best in the industry.

8-WAY BLADE CONTROL

Take command and control on each pass, putting silage, dirt and snow exactly where you want it with Pitbull's available 8-way blade control, including parallel lift and forward pitch.

PARALLEL LIFT

Lift high and straight using Pitbull's parallel lift design. Parallel lift keeps the blade facing the load, maintaining edge control and rolling material forward.

FORWARD PITCH

Gain greater edge precision with forward pitch control, tipping the blade forward for greater edge pressure and improved back dragging.

HUB

- No bulky lift assembly
- Hydraulic quick attach
- High ground clearance

HITCHLESS UNDERMOUNT BRACKET

Pitbull gives operators the most advance blade on the market, featuring our exclusive HUB design, the industry's only parallel lift blade and hitchless undermount bracket. The HUB is Pitbull's

answer to completely eliminating a bulky and awkward lifting assembly permanently mounted to the nose of the tractor. The HUB's slim design also provides impressive ground clearance at nearly factory specification.

30° SIDE ANGLE

Move material side-to-side with the pushing strength of Pitbull's heavy-duty hydraulic cylinders for angling.

10° TILT ANGLE

Easily shape the pile or reach low with hydraulic tilting control.

EASY HYDRAULICS CONNECTION

Connect all hydraulic hoses at one time with the simple lever that makes hook up hassle-free.

Halogen Lights (Optional): Don't let darkness get in the way of working during good weather with the optional halogen lighting system available on the grill extension.

Grill Extension (Optional): Push more material without sacrificing your visual sightlines with the bolt-on height extension.

Bolt-on Extensions (Optional): Maximize each pass with 12-inch bolt-on extensions, giving you 24 inches of extra blade width.

Adjustable Skid Shoes (Included): Raise and lower the heavy plate skid shoes to the perfect height using the ratchet style adjustment.

3060 AG HP Range 300-600

Mould Board Height	48"
